INTRODUCTION

Awareness of professional and community resources available to address addictions is critical in dealing with the devastation of substance abuse. To enhance public awareness of addiction services and programs available to Manitobans, the Alcoholism Foundation of Manitoba has compiled this **Directory of Addictions Services and Programs**.

The purpose of the Directory is to provide a resource manual of addiction prevention and treatment services for social service organizations, community groups, health professionals and concerned citizens. Updates of the manual will be prepared bi-annually.

I am proud to acknowledge the hard work and energy of the many community volunteers, health care and social service professionals identified in the Directory for their invaluable contributions in the addiction field.

I also want to express my sincere gratitude to the AFM staff, particularly our Drug and Alcohol Awareness and Information Unit, for compiling this Directory. I am confident that informational publications such as this will enhance all of our efforts to resolve the pervasive problem of alcohol and other drug abuse.

James Toal, Chairman
Board of Governors
Alcoholism Foundation of Manitoba

January 1992

This Directory has been compiled for the use of individuals wanting information on alcohol and other drug resources in Manitoba.

Listing of any organization or resource in the Directory does not imply legitimization, authorization, or endorsement by the Alcoholism Foundation of Manitoba.

All groups and organizations listed have been contacted and agreed to participation in the Directory.

The Directory lists those agencies/organizations/groups in Manitoba who provide alcohol and other drug treatment, prevention, education or other services to the citizens of Manitoba. The information is listed alphabetically along with a Subject Index which lists each group according to type of program offered or Health Region served.

The listing includes the name of the organization, name of the specific program if indicated, address, telephone number, contact name if available, Health Region(s) served, and program description.

The **Subject Index** was developed according to the following criteria:

Community Committee:	A group of persons working together who want to address the issue of substance abuse through promotion of awareness and other activities for community action.
Prevention/Education:	delivers programs to the public to enhance knowledge and skills in the field of chemical dependency.
School-Based Program:	delivers services to schools.
Self-Help:	A group of persons who meet for personal self-awareness and mutual support.
Seniors Program:	A program specific to persons over 55.
Treatment:	Provided for Substance Abuse. Provided on a Non-Residential basis. Provided on a Residential basis. Other: provided for substance abuse as a part of the program.
Women's Program:	A program specific to women.
Youth Program:	A program that is age restricted to adolescents.

HOW TO USE THE DIRECTORY:

If the name of the organization is known, refer to the alphabetical listing.

If the name is not known, refer to the Subject Index. For example, to find a residential treatment centre in the Norman Region refer to either the Health Region Served listing or Residential Facilities. As an example, the Rosaire House Addiction Centre is listed as a residential facility in the Norman Region.

The aim of this Directory is to provide comprehensive information in a useful format. Readers are encouraged to submit their suggestions, additions or updates to:

Drug and Alcohol Awareness and Information Unit
The Alcoholism Foundation of Manitoba

APPENDIX A

ALCOHOLISM FOUNDATION OF MANITOBA

THE ALCOHOLISM FOUNDATION OF MANITOBA

The Alcoholism Foundation of Manitoba Act was passed in 1956. The Act authorized the provision of facilities and services for treatment and rehabilitation of alcoholics, counselling, education, prevention and research.

In 1976, as a result of the recommendations of the Banmen Report of 1974, the Foundation expanded its mandate to include public health issues related to the use of alcohol and other drugs, prevention, and the funding of private agencies working with clients with alcohol-related problems.

Corporate Mission:

The Alcoholism Foundation of Manitoba is the provincial authority responsible for providing prevention and treatment programs related to chemical misuse and dependency to individuals and communities; for conducting research into the negative effects of substance abuse; and in so doing, for promoting the health and well-being of Manitobans.

Corporate Roles:

As a service provider the AFM conducts intervention, prevention, treatment, rehabilitation, research and evaluation programs, including public information, education and training services; and operates clinics, hospitals centres and offices to deliver such programs.

As a sponsor and funder the AFM enters into agreements with, and makes grants to, government and non-government agencies conducting activities consistent with the mission of the Foundation.

As a leader the AFM provides expertise, encouragement and motivation to the community, government and non-government agencies in addressing the problems associated with chemical misuse and dependency; and thereby promotes the health, independence and potential of Manitobans.

Structure:

The Foundation is a provincial crown agency governed by a Board of Governors appointed by the Lieutenant Governor-in-Council. In the Western and Northern Regions, Regional Advisory Boards made up of interested and informed citizens act in an advisory capacity to the Regional Administrator and the Board of Governors. The efforts of these concerned and committed Board members play a vital role in meeting the needs of Manitobans in the alcohol and other drug abuse field.

Rehabilitation, prevention and education, and impaired driver services are available across the province. These services are administered through regional offices in Brandon (Western Region), Thompson (Northern Region) and Winnipeg (Winnipeg Region). **DUE TO REGIONAL DIFFERENCES, AVAILABILITY AND PROGRAMS MAY VARY FROM LOCATION TO LOCATION.**

Awareness and information services are developed and offered through the **Drug and Alcohol Awareness and Information Unit.** Programs include library, research, and media/information services.

The **Finance and Personnel Unit** plans, controls and operates the accounting, audit, budgeting, finance and purchasing systems of the Foundation. Personnel staff provide support to all staff and are accountable for development, implementation and maintenance of the human resource management program.

The Foundation also supports nine external addictions agencies. These agencies provide a range of services to persons experiencing the effects of the abuse or misuse of alcohol and other drugs. The support of these agencies is in the form of funding grants and encouragement for developing programs.

Funded Agencies:

Alcohol Recovery Communities Inc.
Churchill Health Centre
Kia Zan Inc.
Native Alcoholism Council of Manitoba
Rosaire House Addiction Centre
Sagkeeng Alcohol Rehabilitation Centre Inc.
St. Norbert Foundation
Salvation Army
Women's Post Treatment Centre

AFM SERVICES

WINNIPEG REGION

Winnipeg Region provides services from offices located in Winnipeg, Beausejour, Gimli, Selkirk and Portage la Prairie.

REHABILITATION SERVICES

Intake Services - 944-6200

All individuals accessing Winnipeg Region's rehabilitation programs are initially assessed by the Intake Units. Intake is offered at 1041 Portage for the male population, at the Women's Centre, 586 River Avenue, for the female population, youth at 100 Nassau Street, and in Satellite Offices of Portage la Prairie, Beausejour, Selkirk and Gimli.

Staff assess the degree of a client's chemical use or dependency and refer the client to the appropriate helping resource(s). This resource may be an AFM program/service or another alcohol and drug abuse agency and/or self-help group.

The AFM employs a full-time Clinical Psychologist and part-time physicians who contribute to the assessment process. Intake staff refer clients to these resources when psychological disorders or medical complications/symptoms are evident.

Primary Care Unit - 944-6228

The Primary Care Unit ensures the physical safety of clients while in the final stages of withdrawal from alcohol or other drug use. The Unit has 15 beds (10 men/5 women) and provides medical, psychological and 24-hour nursing care as well as counselling services to those clients who would be at risk if left to withdraw without medical supervision. The Unit allows for early discharge of individuals who have been admitted due to chemical dependency by way of transfer to a treatment program. It also allows community physicians, through the AFM physician, to refer chemically dependent patients for observation, on-going assessment and subsequent referral to a rehabilitation program. Length of stay averages four to five days.

Men's Residential Unit
(1041 Portage Avenue) - 944-6200

The Unit has 30 beds and offers 21-day programming for chemically dependent men.

The criteria for admission is based on the individual's inability to remain abstinent from mood/mind altering drugs in a non-residential setting; difficulty maintaining a healthy level of functioning on a daily basis without using drugs; inability to access non-residential treatment services within the home community.

Clients receive individual and group counselling services, participate in film presentation, discussions and lectures. Following this portion of the program clients are referred to an aftercare program as well as being introduced to a self-help program in the community. It should be noted that in accordance with a client's individual needs, length of stay in residential programming may be extended if required.

Women's Centre for Substance Abuse

River House Residential Program - 944-6229

River House has 15 beds and offers a 28-day program for chemically dependent women. The program includes group and individual counselling sessions, lectures, film presentation and discussion groups. In addition to addressing issues specific to addictions, the program recognizes the complexity of concerns pertaining to a woman's recovery. During the rehabilitation process, links are established to various self-help and community groups for continued support.

Following the program clients are referred to aftercare. It should be noted that in accordance with a client's individual needs, length of stay in residential programming may be extended if required.

Christie House Non-Residential Programming

- 944-6229

Women's Centre staff also coordinate services designed to meet specific needs of chemically dependent women. This includes medical, family and other special issues on an individual and group basis. At Christie House, prevention and education programming to meet community requirements is available, including training for health and social service professionals in the recognition of chemical dependency and the factors which contribute to successful recovery.

Non-Residential Services

- 944-6200

Non-residential rehabilitation programs are available to chemically dependent men and women who have sufficient community resources and supports in place to maintain abstinent without entering a more intensive program. Approximately 13 weeks in duration, the non-residential program offers individual and group counselling sessions, lectures, film presentations and discussion groups. Programs are offered during the day and evening and are open to both men and women or on a gender-specific basis. During the rehabilitation process links are established with various self-help and community groups for continued support.

Day Program - 944-6200

The Day Program is designed for men and women who do not require the structured setting of residential care, but do require a more intense program than that offered on a non-residential basis. The program consists of 14 full days of intensive programming. During the rehabilitation process links are established with various self-help and community group for continued support. Following this portion of the program, clients enter a three-month aftercare component and subsequent follow-up for six months to two years.

Aftercare Services - 944-6200

All rehabilitation programs offer Aftercare groups and individual counselling sessions to clients who have completed their primary program. The duration of aftercare is approximately three months, during which time clients are given the opportunity to explore relapse issues; gain further support in problem-solving (alcohol/drug free); explore community supports that may not have been identified in primary treatment; and to review family issues/concerns relative to support resources. Upon completion of the Aftercare program the counsellor remains in contact with the client on a follow-up basis for approximately two years.

Family Services Program - 944-6229

Day Program: The Family Services Program provides individual and group counselling primarily for the family and/or significant other of an individual participating in an AFM rehabilitation program. The program consists of crisis counselling, family assessments, referral to community resources, family conferences for chemically dependent clients and their families, structured interventions, as well as a formal rehabilitation program (psycho-educational, experiential and group therapy), and aftercare planning.

Evening Program: The evening program provides education and support to individuals who are affected by the chemical use of a friend or family member. Group and individual counselling sessions are provided.

In addition to the above, Family Services staff provide consultation services to a variety of community agencies and groups.

Seniors Program - 944-6200

The Seniors Program has been designed specifically for seniors experiencing alcohol or other drug problems and for those at risk of developing such problems. The program offers outreach/intake for seniors in their home environment; individual counselling as well as group discussions, aftercare and follow-up.

The program is delivered on-site at 185 Smith Street through the cooperation of Age and Opportunity thus making the program more accessible to seniors.

Satellite Services

Rehabilitation services are offered to individuals within the communities and surrounding areas of Gimli (Interlake), Beausejour (Eastman) and Portage la Prairie and Selkirk (Central). The type of services offered include intake/assessment, non-residential programming, aftercare services, referral, affected persons counselling and follow-up. Impaired Drivers' Program assessment services are also offered in Portage la Prairie and Gimli and surrounding areas.

Youth Services - 944-6235

Assessment and Rehabilitation Planning: Adolescents referred to Youth Services are interviewed initially by an Intake counsellor who gathers background information. As part of the assessment process, specialized assessment instruments are used. Depending on the outcome of the intake assessment a referral may be made to the week-long High Risk Program which provides an opportunity for further assessment/intervention.

High Risk Program: High Risk is designed to provide basic education about alcohol and drugs, as well as providing opportunities for clients to self-assess their own use and the consequences of this use. The program is one week in duration, offered during the evening. The majority of Youth clients assessed participate in this program, and as required, clients are referred on to a further helping resource.

Non-residential Rehabilitation: This program is designed for youths who are chemically dependent. The duration of the program is three weeks and is offered daily in the evening. The program offers individual counselling, group and aftercare sessions. During the rehabilitation process, links are established with self-help programs in the community for ongoing support.

Parent Intervention Program: Parents whose child is chemically dependent are encouraged to participate in the this program. The program is open to parents whether or not their child is in treatment. The program provides information on chemical dependency, the effect of dependency on the family and how parents can support their child's recovery. Links are established with a self-help group for continued support.

Prevention and Education Programs

Winnipeg Region provides a broad-range of drug and alcohol related prevention and education services for all target groups including: women, seniors, youth, health care/social service professionals, industry and labour, Community Committees and other groups/organizations. In addition to offering the following "packaged" programs, prevention/education staff respond to a variety of requests to conduct specialized presentations and/or workshops as they relate to the prevention and education of alcohol and other drug issues.

•Issues on Substance Abuse and Women

This two-day program provides health care professionals, employee assistance counsellors and other caregivers with increased awareness and understanding of the unique issues which are common to chemically dependent women. Program components focus on skill development in the areas of recognition, intervention, referral and prevention.

•Tuning In To Health (TITH)

Tuning In To Health is a preventive alcohol and other drug education curriculum designed for students from grades 2 to 9. The program is divided into three components: Early Years, Middle Years and Junior High, and is recommended by Manitoba Education for use with the Chemical Use Section of the Manitoba Health Education curriculum. Youth Unit staff provide in-service training to teachers who will be using the program and work with Manitoba Education to determine and complete program revisions.

TITH Early Years (Grades 2 to 3) examines issues surrounding hazardous products and medicine; Middle Years (Grades 4 to 6) examines such issues as drugs and decision making; drugs and influences and smoking; and Junior High (Grades 7 to 9) examines and deals with the non-use of such substances as alcohol, tobacco, prescription and over-the-counter drugs and other drugs.

•Kids and Drugs

Kids and Drugs is a prevention education program designed for parents and for individuals working with young children who are interested in preventing alcohol and drug problems within this population. The program provides information about

alcohol and other drugs and their use; examines the necessary skills and child rearing practices for preventing drug use, and assists parents with the development of prevention goals, plans and activities. The program is delivered by staff based on demand. AFM also provides a facilitator's training program for individuals interested in becoming volunteer leaders.

•Youth Intervention Strategy Project

Operating on a pilot basis, the goal of the project is to work with selected Manitoba high schools toward developing and implementing school policy and procedures relative to alcohol and drug abuse; designing and implementing student assistance programs; training school staff in the recognition, intervention and referral of students with alcohol and/or other drug problems.

•Youth and Drugs: An Education Package for Professionals

A three-day workshop targeted toward individuals working with youth. The goal of the workshop is to improve the skills of the frontline professional to effectively identify, assess and intervene with adolescents who are developing problems as a result of their use of drugs and alcohol. The workshop also reviews methodologies to assist in the development of community support systems for youth who are experiencing problems with drugs and alcohol.

•Alcohol, Drugs and the Aging

This one-day program provides an overview of current issues relating to alcohol and drug problems among the elderly. The program enables formal and informal caregivers to become aware of their attitudes towards the elderly and alcohol abuse. Program components include an overview of the magnitude of the problem, skill development in the areas of identification, intervention, referral processes and prevention.

Impaired Drivers' Program **- 944-6290**

*Assessment: An assessment interview to determine the degree of an offender's chemical use is the initial step for offender's accessing the Impaired Drivers' Program. During this interview the offender completes an assessment questionnaire which is discussed with the counsellor along with various issues relative to an offender's chemical use. From this interview the counsellor determines what extent alcohol and other chemicals have interfered in the offender's life. Dependent on the outcome of the assessment, no further action may be required or an offender may be referred to an education workshop, high risk program and/or rehabilitation program. With the offender's authorization assessment results are reported to the Division of Driver and Vehicle Licensing.

Education Workshop: The goal of this one-day workshop is for offenders to develop alternative plans to drinking and driving. The workshop provides accurate information on alcohol and other drugs and how use of same affects the ability to drive. It differentiates between drinking and driving behaviours. Offenders at risk of re-offending due to their attitude to driving after drinking are referred to this workshop upon the completion of the assessment process.

High Risk Program: The goal of the High Risk Program is to influence and encourage behaviour change related to chemical usage and life functioning of individuals convicted of impaired driving who have been assessed "at risk" of developing a chemical dependency problem. During the program, offenders increase their knowledge about their own chemical usage and develop a plan of action to address issues identified. This encourages self-directed learning on the part of the offender.

Rehabilitation Program: Individuals identified as being chemically dependent are referred to an AFM Non-residential, Day or Residential program and/or an alternative helping resource.

*Fee applicable to this service.

Community Education Courses **- 944-6260**

The AFM offers a variety of core alcohol and drug related education courses which are based on the latest research and developments in the drug abuse field. Adult learning concepts and principles are utilized in all courses. Courses are offered on a regularly scheduled basis to helping professionals and the general public. Some of the courses offered include: Chemical Dependency Intervention Course, Counselling Alcoholic Clients, Group Skills for Addiction Counsellors, Presentation Skills, Prevention of Drug Abuse, Essential Prevention Concepts and Strategies, Assessment and Treatment Strategies in Chemical Dependency and Relapse Prevention. A complete Course Calendar is available.

Employee Assistance Programs **-944-6260**

The AFM assists employers in developing EAP services and programs as well as providing training for referral agents, supervisors, management and union representatives on issues related to drug/alcohol and other personal problems which are affecting an employees work performance. A five day Referral Agent Training Program is offered and provides management, staff and union leaders with the knowledge and skills required to act as Referral Agents to ensure the employee gains access to services which are required. Program components include a basic history and description of the EAP process, overview of the role of the referral agent and community resources available to assist troubled employees, as well as skill development in basic communication.

WESTERN REGION

Western Region provides services from offices located in Brandon, Ste. Rose du Lac, Dauphin, Minnedosa, Rossburn and Swan River.

REHABILITATION SERVICES

Residential Programs - 729-3838

Primary Care is a residential care program (2 beds) for clients who require support during withdrawal from the use of chemicals. A nurse/counsellor team monitors the medical requirements of the client and initiates the rehabilitation counselling component of the Unit prior to the client entering a formal rehabilitation program. In Ste Rose du Lac, Primary Care is provided by the Ste. Rose du Lac Hospital.

Residential Treatment at Sun Centre in Brandon (15 beds) and Willard Monson House in Ste. Rose du Lac (15 beds) provides a 21-day residential rehabilitation program for men and women. The program addresses the addiction problem and the reintegration of the client into the community through the support of family, friends and other resources.

The rehabilitation program is holistic in its approach and relies on self-help organizations and agencies in the community to assist clients in recovery. While the program is co-educational, women where possible are counselled by female staff, attend women's groups, and have access to specific resource materials.

Non-Residential Programs

A **Non-residential Program** is available for those persons who have family/ community supports and do not require the intensive daily intervention of a residential program. Individual and group sessions are designed to prevent the need for residential rehabilitation, and to stabilize the individual within the community.

Community Addiction Workers (CAWs) in Rossburn, Minnedosa, Brandon, Dauphin and Swan River provide non-residential counselling services to clients in the Western Region. CAW staff liaise on an ongoing basis with helping agencies, caregivers, community and health groups to ensure a high standard of care for clients in their community.

Aftercare programs are available to all clients participating in rehabilitation programs. Aftercare assists the client's reintegration into the community through the support of family, friends and other resources.

A **Relapse Prevention Program** assists those clients assessed as being at high risk of relapse. Client groups meet weekly with a counsellor and upon completion continue in a self-help mode.

Family Awareness Program groups are held to provide support for the affected relatives, friends and employers of the chemically dependent client. The **Family Program**, a ten-week education and awareness program combined with individual counselling complements services to families.

An **Intake and Orientation Project** was recently instituted. The purpose of the program is to orient clients to the AFM's programs/services and is presented in a group setting followed by an assessment interview on an individual basis. This orientation allows clients to enter the continuum of care without an appointment.

Impaired Drivers' Program (IDP)

Counsellors in Brandon and Dauphin provide *assessment, referral, education and treatment services to impaired drivers in the Western Region. The IDP includes assessment services, education workshops, high risk program, non-residential and residential rehabilitation program referrals. *Fee is applicable to this service.

PREVENTION AND EDUCATION PROGRAMS

Community Education Courses

Western Region staff provide a range of courses focusing on knowledge of addictions and skills related to the management of alcohol/drug related problems. Prevention Education Consultant (PECs) staff can assist organizations with customized courses.

YOUTH PROGRAMS

A non-residential youth program is presently only available in Winnipeg. In the Western Region staff work with local youth groups, schools and community groups to provide support for youth in alcohol/drug free lifestyle activities. Some examples include Student Match, peer support, Students Triumph Over Problems (STOP), and Kids Interested in Staying Straight (KISS).

"Tuning In To Health" (TITH) is a practical, comprehensive drug education program for grades 2-9 (optional). Western Region staff provide in-service teacher training and follow-up to this program which is widely used throughout the Region's schools.

Western Region staff provide presentations on alcohol and other drugs and organizational support to the many youth groups throughout the Region.

Employee Assistance Programs (EAPs)

Regional staff assist employers in establishing Employee Assistance Programs. The EAPs are designed to help employees/employers to identify the distressed employee, encouraging them to seek help and access to services required. Western Region staff can provide information sessions, consultation and training of labour and management in developing and maintaining an effective EAP policy.

NORTHERN REGION

Northern Region provides services in Thompson, The Pas, Flin Flon, and Leaf Rapids areas of Manitoba.

REHABILITATION SERVICES

Residential Programs - 677-4541

The Polaris Place facility offers a 21-day residential program that addresses the problem of client addiction and the reintegration of the client into the community through the support of family, friends and community resources. The majority of Polaris Place clients are of Native ancestry. The Native Culture Program has been developed to recognize this fact. The program provides an introduction to some aspects of Native culture, to explore ways in which alcohol and drug use has interfered with the expression of traditional values and beliefs, and examines some of the issues surrounding cultural conflict.

The residential program is co-educational and a women's group is an important part of the program. In addition to the regular programming, the group itself determines its own needs and presently includes such topics as parenting, self-image and relationships with partners in its discussions.

An eight-bed **Halfway House** is also located at Polaris Place. The House provides a supportive, drug-free environment for chemically-dependent individuals actively involved in a recovery program. The Halfway House assists these individuals who have completed the rehabilitation program to prepare for return to the community. The program is self-supporting as clients pay room and board.

Non-residential Treatment

Aftercare is an important component in the recovery process. As a client progresses through the rehabilitation process, Northern Region staff provide aftercare support. Client/counsellor contact is maintained for some time through the residential/non-residential programs, continuing care, community link-ups and follow-up.

A Family Awareness Program is also available. The purpose of this program is to help participants understand the impact of chemical dependence on family members.

Community Addictions Workers (CAWs) in The Pas, Thompson, Flin Flon, and Leaf Rapids provide non-residential services. This program is for clients who do not require the intensive daily intervention of a residential program. Staff work in the community with other groups and agencies who support the continuing recovery process.

Impaired Drivers' Program

The province-wide Impaired Drivers' Program is available in the Northern Region at Thompson and The Pas. Counsellor staff provide *assessment, referral, education and treatment services for impaired drivers as mandated by the Highway Traffic Act. The Northern Region IDP includes assessment services, education workshops, high risk program, non-residential and residential program referrals. *Fee is applicable to this service.

PREVENTION AND EDUCATION PROGRAMS

Northern Region staff offer a variety of prevention and education services. Programs provide for the development and delivery of specialized presentations and/or workshops as they relate to the prevention and education of alcohol and other drug issues.

Prevention and education activities include the delivery of alcohol and drug awareness sessions for community caregivers, teachers and other professionals. As well regional staff receive numerous requests for public information and education presentations. Staff are involved in such workshops as Systematic Training for Effective Parenting (STEP) and Management of Intoxicated and Disruptive Persons.

Community Education Courses

Northern Region staff offer courses focusing on knowledge of addictions and skills related to the management of alcohol/drug related problems. The Chemical Dependency Intervention Course (CDIC) is just one course available to Northern residents. Staff are also able to assist groups with customized courses.

YOUTH PROGRAMS

A rehabilitation program for youth is available only in Winnipeg on a non-residential basis. Northern Region staff work within the community to promote alcohol and drug free lifestyle activities. Staff are available to assist students and teachers and regularly make presentations in the schools in the Region. In addition to teacher training and facilitating parent awareness sessions for the Tuning In to Health (TITH) program, regional staff conduct workshops for school staff on such topics as signs and symptoms of drug use, helping children of alcoholics, and the effects of alcohol and other drugs. Staff also consult with school divisions in developing policy and procedures to help students who come to school under the influence.

Staff work with school groups to initiate programs that deal with leadership and that foster healthy lifestyles and promote parenting groups and training through programs like STEP and Kids and Drugs, providing facilitation when necessary.

Employee Assistance Program

Northern Region staff work in the business community to develop Employee Assistance Programs. Staff can provide information sessions, consultation and training of labour and management in developing and maintaining an effective EAP policy. The purpose of EAP is to provide a program whereby employees who have a personal problem of any kind (not only substance abuse) will know where helping resources are available.

DRUG AND ALCOHOL AWARENESS AND INFORMATION UNIT

This Unit delivers its programs from the Provincial Administration offices in Winnipeg.

Research and Data Services

Research services oversee the major program evaluations and research activities of the Foundation. This includes research conducted by outside researchers with involvement of AFM data or clients, or projects carried out by internal staff resources. A strict protocol is in place to preserve client confidentiality and to ensure ethical standards for all research projects

A Uniform Data System is maintained to provide a statistical data base on AFM clients and programs. The data base includes the agencies funded by the Foundation.

Awareness and Information Services

The collection and dissemination of information about alcohol and drug abuse issues and services is the primary focus of Awareness and Information Services. This includes media services, program promotional materials, a directory of services, newsletter, development of AFM information for publication, and other information projects.

William Potoroka Memorial Library

The province's most comprehensive collection of books, journals and audio/visual titles is maintained by the Library. This collection is available to the public throughout Manitoba. The Library also operates as the distribution centre for most AFM informational documents such as pamphlets, brochures, catalogues, posters, etc.. On-line computer connections with some provincial and national libraries and information centres are maintained.
